

Dear FCC,

I benefit from listening to XM Satellite Radio and its traffic and weather channels. I live in in an area of Kansas that dosen't offer many listneing choices or a variety of radio entertainment and information. Satellite radio provides variety and quality that are not available around here. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.

Sincerely,

M. Gene Farley
